

# E-Mail Security for the Financial Sector

## Meet the requirements of DORA with eXpurgate

The financial sector is a favoured target for cybercriminals who target confidential information and financial data. A single security incident can have serious consequences, including financial losses, reputational risks and legal repercussions. A highly efficient email security solution is therefore essential to protect your organisation and your customers from these threats.

### EU-wide DORA regulation

With the EU-wide DORA Regulation, mandatory standards will apply from 2025, which will also significantly raise cyber security requirements in the German financial sector. Now is the time for affected companies to act.

### Impact of DORA on the German financial sector

**DORA** (short for: Digital Operational Resilience Act) is EU legislation aimed at strengthening the digital resilience of the financial sector in the European Union. It comes into force on 17 January 2025.

As an EU-wide regulation, **DORA** will have a significant impact on the German financial sector. Overall, German financial service providers will be required to strengthen their cybersecurity measures and ensure that they meet the growing challenges in the area of cybersecurity.

**With eXpurgate, you are choosing an email security solution that specialises in the financial sector. We support you in your goal of achieving DORA compliance for your company.**

### Your benefits

Specialised in the requirements of the financial sector

Threat detection through advanced algorithms and AI-supported detection

Reliable protection against advanced threats such as phishing, malware and ransomware

Compliance with data protection regulations in the sense of DORA

Compliance with guidelines in the sense of DORA

## What you should know about DORA:

### Complexity of the requirements

The DORA regulation is extensive and complex, which makes implementation and compliance a challenge for financial service providers.

### Investment in Technology & Know-how

Achieving **DORA** compliance requires modern security solutions, employee training and possibly the recruitment of cybersecurity specialists.

### E-Mail-Security is gaining relevance

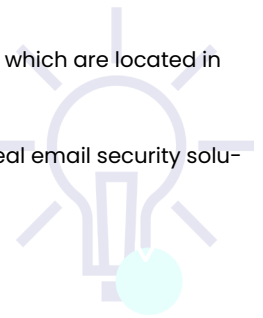

Email is the number one gateway for cyber criminals. Security in email communication is therefore a decisive factor in achieving **DORA** compliance.

### E-Mail-Security: This is how eXpurgate supports you in DORA conformity

eXpurgate is the professional email security solution specialising in the German financial sector. By analysing over 1 billion emails every day, which serve as a comprehensive data basis for AI-supported detection, eXpurgate offers maximum protection against spam and advanced threats such as phishing, malware and other critical online dangers.

Everything is 100% „Made in Germany“ – this applies to both the detection teams and the data centres, all of which are located in Germany. We therefore offer our customers the highest standards in terms of data protection and security.

The extremely high detection performance and our high data protection standards make eXpurgate the ideal email security solution for the financial sector. This gives companies the support they need to achieve **DORA** compliance.
