

Digital Invoice Management with the e-invoice

The software solution from the dataglobal Group enables efficient invoice management in accordance with current EU regulations. B2B companies thus benefit from all the advantages of the e-invoice and respond to the gradual introduction of mandatory e-invoicing from 2025.

E-invoice with the dataglobal Group

The solution reads the invoice content, validates it and transfers it to the standardised invoice workflows. All content is legible and invoice verification can be continued as with a previous invoice. Audit-proof archiving is also possible without any problems.

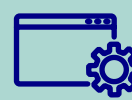

Advantages of the e-invoice at a glance

Automated processing of incoming invoices

Legal certainty in accordance with EU regulations

Simple integration into existing systems

Time-saving and cost-efficient thanks to automated processes

Revision security for secure archiving

Paperless process for invoicing

Functions of the e-invoice

Fast processing of incoming e-invoices

Reading, validation and transfer of incoming e-invoices within seconds.

Error reduction through test algorithms

Automatic checking of e-invoices for errors or discrepancies. This leads to a noticeable reduction in errors when processing invoices.

Legal certainty

All EU regulations for electronic invoices are taken into account. Companies benefit from legally compliant invoice management, especially in view of the e-invoice obligation on 1 January 2025.

Time-saving and cost-efficient

Optimised and automated processes reduce the effort and costs involved in invoice management.

Revision security for secure archiving

Invoices can be stored in the ECM system in an unalterable and audit-proof manner.

Paperless process for invoicing

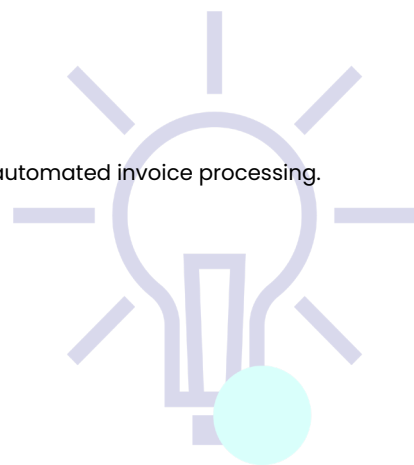

Completely digital handling of all processes relating to incoming and outgoing invoices. This avoids full filing cabinets and manual work, e.g. manually processing invoices or retrieving them from the archive.

Integration into existing systems

Seamless integration into existing IT infrastructures.

Scope of the solution

Our solution for processing e-invoices offers you comprehensive functions for efficient and automated invoice processing.

Legal background

The e-invoice obligation will be introduced gradually from 2025.
