

## vysoft honoured for top service and vision for the future

***The provider of resource management solutions, which is part of the dataglobal Group, is honoured for its forward-looking approach and maximum customer focus. Award ceremony at the Big Bang AI Festival in Berlin.***

**Heilbronn, 6 August 2024** – vysoft, the Microsoft-based resource management solution portfolio from the dataglobal Group, has been recognised for its future viability and exceptional customer focus.

The vysoft solutions have inspired customers in business and public institutions for many years by intuitively booking resources such as desks, meeting rooms, company vehicles and parking lots. They facilitate the flexible organisation of everyday working life between home office, remote work and working in the office. For example, they promote creativity and a feedback culture by bringing the right employees together in desk sharing. They also provide concrete utilisation data, enabling more efficient and sustainable use of office space and other resources.

The vysoft team has now been honoured with two awards from the German Innovation Institute for Sustainability and Digitalisation (diind). As a result of a multi-stage review process, vysoft has received the Top Service award, which is given to companies that prioritise customer focus and satisfaction. Furthermore, Holger von Chossy, Managing Director and Founder of vykon GmbH & Co. KG was honoured as Entrepreneur of the Future. The award recognises business leaders who are exceptionally proactive and committed to seizing new opportunities and thus shaping their solutions for the future. Both awards recognise the vysoft team for its transparent actions, clear values and open communication with customers and partners.

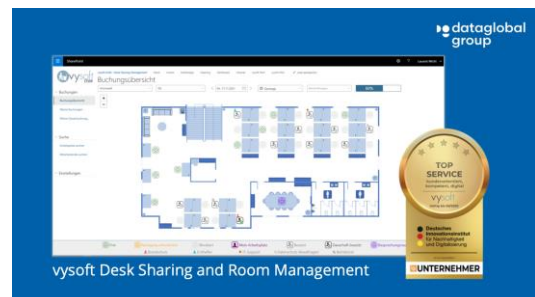

*"These two awards are the result of the continuous efforts of the entire vysoft team. We utilise modern technologies to provide our customers with outstanding solutions that simplify their day-to-day work and open new potential. We are delighted that our efforts are not only reflected in a high level of customer satisfaction but are now also recognised by the diind jury,"* explains **Holger von Chossy**. *"Good products are only created by a good team, in which everyone involved can contribute equally and at eye level. This company philosophy is reflected in these awards."*

Based in Grünwald near Munich, vykon has been part of the dataglobal Group since the spring, enabling modern, mobile and secure working with an integrative approach to the digital workplace comprising document, data and process management and secure email communication. *"The vysoft solutions perfectly address the new working reality in companies and ensure efficient and sustainable utilisation of resources. They promote creative team collaboration in desk sharing and create space for a new feedback culture and exchange,"* adds **Nicolas Schwarzpaul**, CEO of the dataglobal Group. *"We are proud to have the vysoft team and its innovative solutions on board. We congratulate them on the well-deserved awards for best customer orientation and future viability."*

The two awards will be officially presented at the Big Bang AI Festival in Berlin on 11 and 12 September 2024. The organisers have set themselves the goal of making SMEs in Germany fit for the future with this B2B event. In high-calibre keynote speeches, panel talks and workshops, participants will learn how to use artificial intelligence in a targeted manner for their company.
